Profile

Software Engineer (Frontend) with previous experience at Arab African International Bank (AAIB), building responsive, high-performance web applications in the banking sector using React, Next.js. Focused on writing clean, maintainable code, and creating smooth, user-friendly experiences. Experienced in API integration, performance optimization, and delivering production-ready features in agile environments. Contributed to multiple banking projects, including online banking platforms, internal control systems, content management systems, and corporate websites. My professional development includes the ITI UI/UX Development Track, Front-End Development training at Route, a Cybersecurity SOC Analyst Diploma from AMIT Learning, and Front-End Development training at Black Horse Courses. I am currently expanding my backend development skills through Route's Backend Development Diploma, focusing on Node.js.

Work Experience

2025/08 – 2026/08
Digital Factory of
AAIB, St 90, Building
192

Technology Software Engineer (Frontend)
