Profile

Software Engineer (Frontend) with previous experience at Arab African International Bank (AAIB), building responsive, high-performance web applications in the banking sector using React, Next.js, TypeScript, Tailwind CSS, Shadcn/ui, Bootstrap, GraphQL, Redux, and Zustand. Focused on writing clean, maintainable code, and creating smooth, user-friendly experiences. Experienced in API integration, performance optimization, and delivering production-ready features in agile environments. Contributed to multiple banking projects, including online banking platforms, internal control systems, content management systems, and corporate websites. My professional development includes the ITI UI/UX Development Track, Front-End Development training at Route, a Cybersecurity SOC Analyst Diploma from AMIT Learning, and Front-End Development training at Black Horse Courses. I am currently expanding my backend development skills through Route's Backend Development Diploma, focusing on Node.js. Currently seeking a new opportunity as a Frontend Software Engineer where I can leverage my technical skills, and continuous learning to contribute to impactful products and challenging projects.

Work Experience

2025/08 – 2026/08
Digital Factory of
AAIB, St 90, Building
192
